Award Date	07/20/2009		
Award Description	This grant funds 3 important water quality management planning projects. CREATING A TRAINING BLUEPRINT FOR GREEN JOBS IN DELAWARE addresses water quality and TMDL issues by including options and requirements for sustainable landscaping practices, low impact development including the use of rain gardens, rain barrels, cisterns, pervious pavement, green roofs, and other green technologies. Conservation, restoration and/or enhancement of wetlands and forested areas, including riparian buffers, are highly encouraged and rewarded as well. Finally, implementation of Pollution Control Strategy recommendations, which address and implement TMDL requirements, have also been

<p>included within the criteria for Super Green Certification.</p> <p>A major barrier to building green projects is the lack of trained and qualified laborers available to properly install green infrastructure and energy efficient practices. Builders and contractors may lack knowledge of conservation practices, available green technologies, and skills to install green technologies. Local government and decision makers such as planning and zoning commissions, also lack knowledge of the benefits and need for environmentally sustainable and energy efficient practices, lack resources to review and approve projects with such practices, and lack knowledge to be able to recommend changes to existing codes or be able to develop new codes and ordinances related to green infrastructure, water quality and energy. As part of the Super Green Initiative, we have also identified a need for a new skill set for the private sector that will prepare environmental reviewer to verify green building practices. This project focuses on a training plan in order to fill these voids.</p> <p>ST. JONES RIVER WATERSHED PLANNING involves the passing through of funding from DNREC to the City of Dover to support efforts to develop an implementation plan that will identify water quality improvement projects that are feasible based upon published water quality benefits, the cost-benefit of the projects, landowner willingness, and other factors that will enhance the likelihood of success. The implementation plan will identify sources of</p>

funds and leveraging opportunities for design and construction of candidate projects. Additionally, the City of Dover desires to plan and create a stormwater utility for that portion of the Watershed within the City's municipal boundaries that will meet the requirements of Municipal Separate Storm Sewer System (MS4) regulations.

INLAND BAYS POLLUTION CONTROL STRATEGY IMPLEMENTATION PLANNING will fund efforts of the Sussex Conservation District to receive training on the PCS regulations, assist DNREC with training of consultants, review Best Management Practices (BMPs) necessary to achieve nutrient reductions called for by the TMDLs, review location and width of buffers from primary and secondary water features, determine developer/contractor compliance with the stormwater elements of the Regulation and provide compliance assistance, and determine which parcels are subject to the Regulation based upon criteria outlined in Section 1. Authority and Scope.

Project Information

Project Name or Project/ Program Title	FY 2009 DE DNREC ARRA WQMP Grant	Activity Codes (NAICS or NTEE-NPC) (up to 10)
Quarterly Activities/ Project Description	<p>The Delaware Technical and Community College green jobs curriculum project continues to move forward and is on track. The subject matter experts continue to develop lesson plans for the modules. The St. Jones Watershed coordinators developed a rain garden sign for the Delaware Agricultural Museum. The rain garden and sign was paid for by a Community Water Quality Improvement Grant from the Delaware Clean Water Advisory Council. On September 7, 2011, the St. Jones Watershed Coordinators, along with Delaware State University (DSU) College of Agriculture and Related Sciences faculty and students, planted a rain garden as part of the EPA's "Rain Gardens for the Bays" Program. This rain garden was done as a green initiative with the support of DSU's Think Green Campaign. The garden, which is in front of the new addition to the Ag Annex building, was planted with hibiscus, switchgrass, swamp sunflower, and blue flag iris which were grown by Polytech High School students. In addition, the two Coordinators developed several brochures and posters dealing with stormwater issues within Dover. These activities will help Dover with their MS4 stormwater permit. They also continued to prepare Silver Lake Commission meeting agendas, materials and minutes and to plan and assist with stormwater improvements to the grounds of the Delaware Agricultural Museum.</p>	<p>Activity Code 1 C06.09</p> <p>Activity Code 2</p> <p>Activity Code 3</p> <p>Activity Code 4</p> <p>Activity Code 5</p> <p>Activity Code 6</p> <p>Activity Code 7</p> <p>Activity Code 8</p> <p>Activity Code 9</p> <p>Activity Code 10</p>

Project Status		Completed 50% or more
Total Federal Amount ARRA Funds Received/ Invoiced		172665.39
Number of Jobs		0.87
Description of Jobs Created		The Number of Jobs was calculated as a quarterly FTE per OMB guidance (M-10-08). The St. Jones Watershed Coordinator positions were funded entirely by this ARRA grant during the quarter. A total of 877.5 work hours were available during the quarter and 765.00 hours were worked between the 2 Coordinators; therefore, the number of jobs created is 0.87. One of the Coordinators accepted a job with EPA Headquarters and terminated employment with the City of Dover on September 9, 2011.
Total Federal Amount of ARRA Expenditure		178108.72
Total Federal ARRA Infrastructure Expenditure		0.00
Infrastructure Purpose and Rationale
